About Me

I am a results-driven professional with over 2 years of experience in sales, now transitioning into data analytics. During my time as a Sales Executive, I achieved 95% year-on-year sales growth (2024–2025) by analyzing customer and market data to identify new opportunities. This experience sparked my passion for data-driven decision-making, leading me to build strong skills in SQL, Python (pandas), and Tableau. Through these tools, I've completed end-to-end data projects that turned raw datasets into actionable insights. I am especially interested in pursuing a Sales Analytics role, where I can combine my business acumen and analytical expertise to help companies optimize sales performance, enhance customer retention, and drive strategic growth.

Education

Parahyangan Catholic University

Aug, 2018 – Aug, 2022

Accredited for IABEE (Signatory Member of Washington Accord)

GPA: 3.39

Bachelor of Chemical Engineering

RevoU

Jun, 2025 – Sep, 2025

Full-stack Data Analytics

Completed Full-Stack Data Analytics (FSDA) training at RevoU, developing comprehensive skills in data analysis, visualization, and full-stack analytics practices. Gained proficiency in SQL, Python, and Tableau for data manipulation and dashboard creation, along with hands-on experience in end-to-end data processing to support informed decision-making across various domains.

Working Experiences

Sales Executive, PT. Colorindo Chemtra

Feb, 2023 – Jun, 2025

- Built and maintained relationships with 70+ active customers by documenting individual needs through regular visits and phone contacts, improving retention and driving repeat purchases by 130%.
- Promoted products to new and existing clients through exhibitions and regular visits, expanding my personal customer base to ~300 customers and contributing to overall revenue growth.
- Executed targeted customer engagement strategies that delivered 95% year-on-year sales growth.

Industrial Microbiology Laboratory Assistant, Parahyangan Catholic University

Jan, 2022 – Jun, 2022

- Assisted and evaluated 78 second-year students during the first in-person lab sessions after COVID by monitoring safety protocols and guiding experiments, ensuring successful completion of practical modules and improving procedural adherence.
- Developed standardized guides and coordinated 7 co-assistants through shared PowerPoint and weekly briefings, ensuring consistent instruction and 100% on-schedule completion of all practical sessions.

Project Experiences

Food Adulteration Analysis, RevoU

Aug, 2025 – Sep, 2025

- Collected and cleaned 1,000 raw food records using Spreadsheets and Python to standardize formats and remove missing values, enhancing dataset reliability and accuracy for analysis.
- Delivered insights on the top 3 adulterated products through exploratory data analysis and spreadsheet trend tracking, recommending 4 targeted risk-mitigation actions that supported monitoring and food safety decisions.
- Designed 6 interactive dashboards in Tableau integrating risk metrics and trend analysis, enabling stakeholders to quickly identify high-risk products and brands for monitoring decisions.

Additional Information

Technical Skills: Excel, SQL, Python, Tableau, Power BI

Soft Skills: Analytical thinking, problem-solving

Certification:

- RevoU Full Stack Data Analytics Program – Certificate of Achievement Oct, 2025
- IELTS Academic — Overall Band 7.5 (Listening 8.5 | Reading 7.5 | Writing 6.5 | Speaking 6.5), British Council June, 2024
- Work Smarter, Not Harder: Time Management for Personal & Professional Productivity, University of California, Irvine - Dec, 2020
Coursera
